

# SQUADI DEVELOPMENT RELEASE

## Referee / Officials Updates

### Official Module Enhancements

#### Impact On (FQ, Clubs, Participants)

- Added the ability to email notification for referee appointments
- Added a red triangle on the officials’ payments to indicate referees that have not yet set up a Stripe Account
- Added push notifications to users when fixtures are published with updated time/date/venue/field

## Match Day Updates

### Match Day Module Enhancements

#### Impact On (FQ, Clubs)

- Added Best and Fairest reporting by user ID
- Added the ability to display a combined ladder by club of all the age groups within that competition in the club championships ladder

### Fixture Module Enhancements

#### Impact On (FQ, Clubs)

- Added the ability to fixture anyone vs. anyone in the fixture module
- Added new settings on the competition format page - when affiliates are making changes to home matches, the ability to publish when the away team approves or only when the home team makes the changes
- Added the ability for clubs/teams to fixture their own matches (date, time, venue) via the app

### Teams Module Enhancements

#### Impact On (FQ, Clubs, Participants)

- Added the ability to print a PDF team list

## General Updates

### User Module Enhancements

#### Impact On (FQ, Clubs, Participants)

- Added modules; registration and evaluation, as related reference data when creating custom questions
- Added the ability to create sorting for admins that can be applied in the user registration form; category and sort column
- Removed the ability to have 2 short answers the same
- Multiple choice questions will be separated by a comma in the export
- Added the ability to delete custom questions
- Added the ability to edit custom questions
- Added the ability to add admin notes to a user profile
- Added match notification choices in an official’s user profile
- Added admin bulk registration to an admin’s user profile
- Added the ability for a user’s invoice to update when a refund has failed

### Registration Module Enhancements

#### Impact On (FQ, Clubs, Participants)

- Added the ability, when communicating with users via clearances, to take the admin to the communication module and pre-populate it with the user/match information they selected
- Added the ability to communicate by email, or push notification by match, role type and selected individuals - fixtures module, match day and user dashboard
- Added the ability to add a membership setting that allows registering org admins to bulk register participants and teams without the individual answering registration questions to specific membership product types
- Improved the ability to navigate back and zoom into org level in the heat map
- Added registration group to the end users email receipt
- Added a new registration competition type: Re-Affiliation

### Finance Module Enhancements

#### Impact On (FQ, Clubs, Participants)

- Added the ability to mark payment plans/installments as received online
- Added the ability to allow multiple recipients to access a single payment plan setup

### App Enhancements

#### Impact On (FQ, Clubs, Participants)

- Added the ability for the watch list to display if the team/division competition is hidden
- Team Officials photo will now display on the app
- Added a new pop-up when declining or accepting a chat. A child cannot accept without a parent, and a child cannot stay in a chat without the parent

### Evaluations Module Enhancements

#### Impact On (FQ, Clubs)

- Admins can now create evaluation templates for players, referees or surveys
- Added the option to add a new template by selecting “Add New” and naming the template
- Added the ability for admins to define rules (e.g. affiliate organisations to limit template visibility)
- Admins can add questions with various data types, including text, numeric, date, boolean, single and multiple choice, star rating, and media (image or video) attachments
- Added the ability for each question to have configurable validation options (min/max, mandatory/optional)
- Added the ability for admins to set questions as visible or hidden to the participant
